

Geography Knowledge Organiser - From Farm to Fork!

What will we learn?

Week 1: To find out how far our food has travelled to get to our plate?

Week 2: How does our food travel and how does it stay fresh?

Week 3: How is our food grown? What is Fair Trade?

Week 4: What is my carbon footprint on the world?

Week 5: Who is Mary Seacole and what herbs did she grow?

What could I do at home?

Can you look out for items on the shelves at the supermarkets that have this label?

This means that the farmer, the lorry driver, the supermarket worker have all been paid a fair amount of money for their work.

Do you think this is important? Why?

Key Vocabulary

Carbon Footprint

The amount of carbon 'green house gases' produces from an activity..

imported

Brought in from another country.

food production

Producing food by growing it.

consumer

The people who buy the food.

Sticky Knowledge

Food travels by air, road and sea to get to our plates!

Carbon Footprint

When food travels by air, road or sea it is bad for our environment.

Mary Seacole

Mary mixed plants together to make herbal medicine to help the wounded soldiers, as other medicines were not easily available.

Books that we are reading for pleasure or knowledge...
